

There has been lots of attention on
Covid-19 Vaccine side effects

USA VAERS Reported Adverse Events

OpenVAERS HOME COVID VACCINE DATA SEARCH ALL REPORTS FAQ f t i

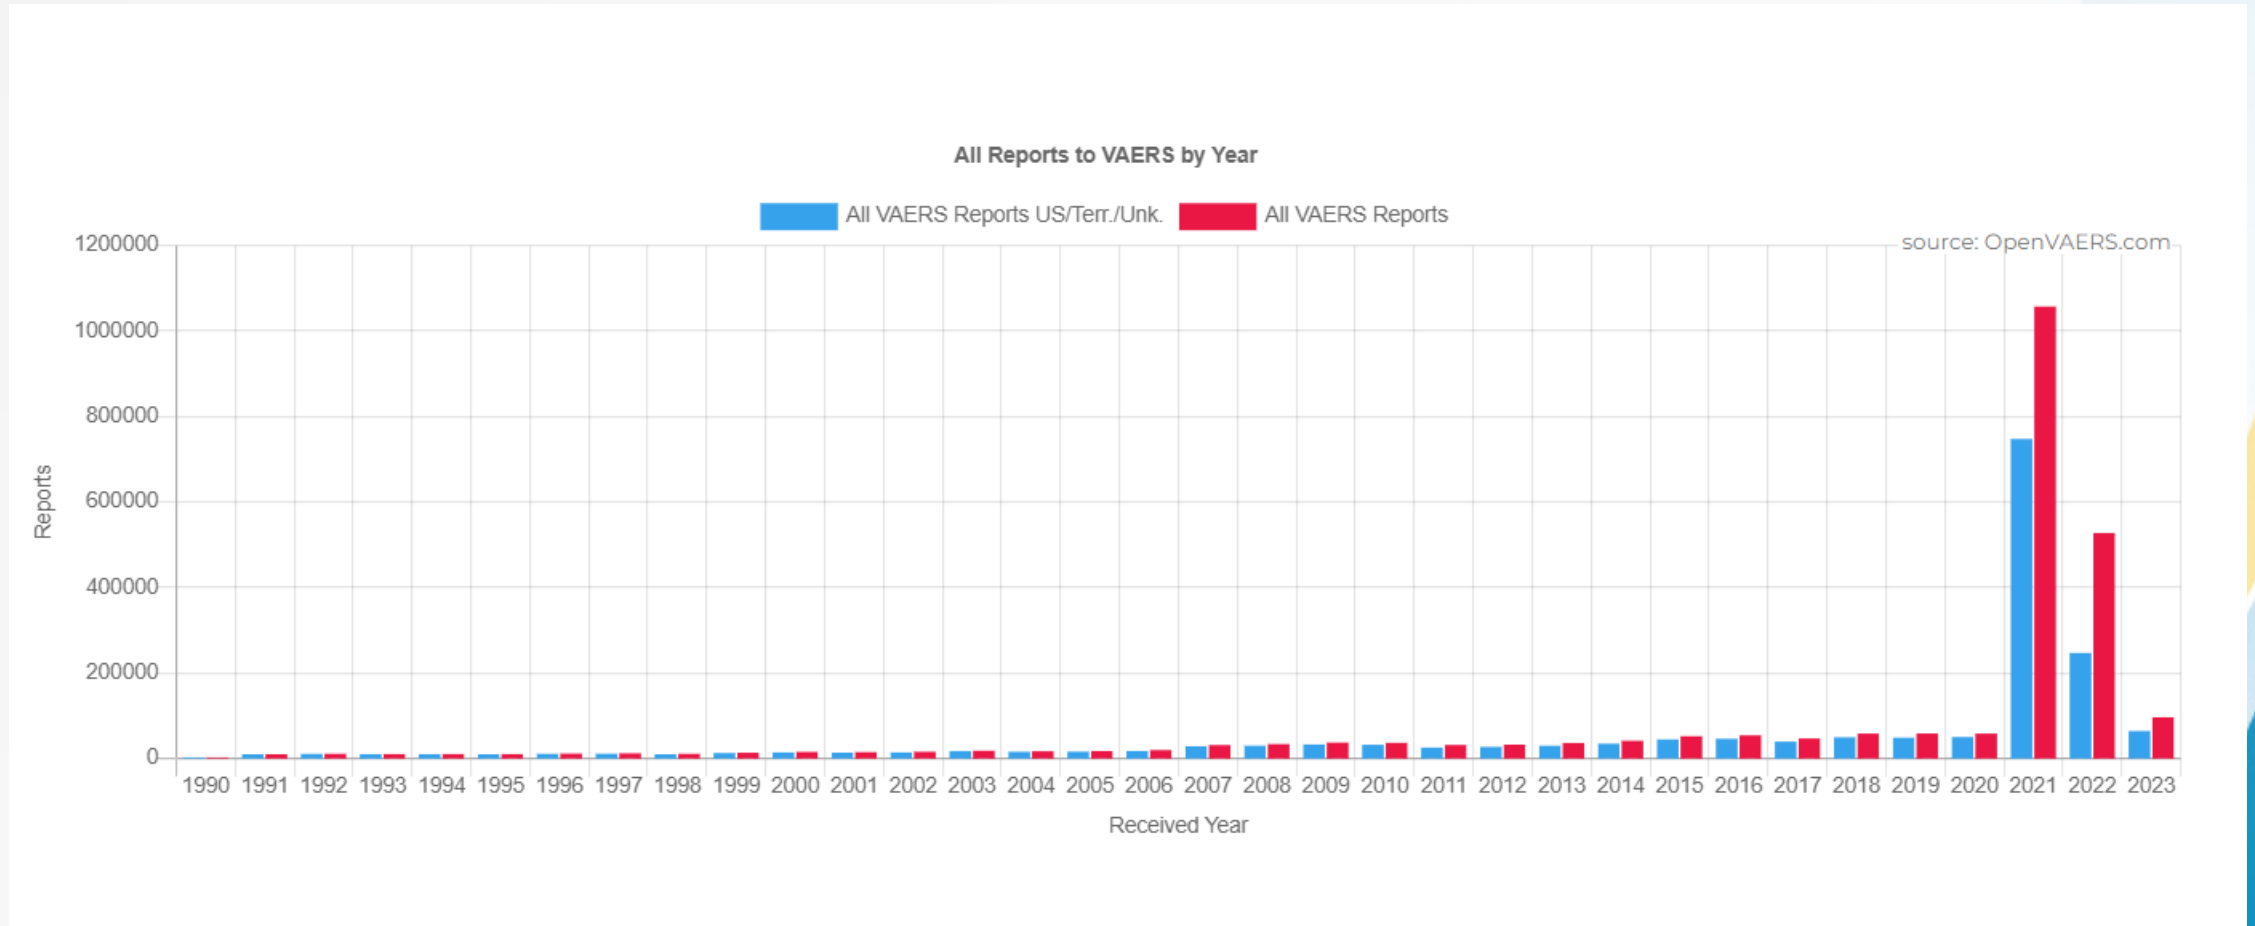

VAERS is the Vaccine Adverse Event Reporting System put in place in 1990. It is a voluntary reporting system that has been estimated to account for only **1% (read more about underreporting in VAERS)** of vaccine injuries. **OpenVAERS** is built from the HHS data available for download at vaers.hhs.gov.

The **OpenVAERS Project** allows browsing and searching of the reports without the need to compose an advanced search (more advanced searches can be done at medalerts.org or vaers.hhs.gov).

2,501,649

- **REPORTS OF VACCINE ADVERSE EVENTS IN VAERS**
- **35,646 COVID Vaccine Reported Deaths / 45,628 Total Reported Deaths**
- **206,697 Total COVID Vaccine Reported Hospitalizations/293,253 Total Reported Hospitalizations**
- **1,576,797 COVID Vaccine Adverse Event Reports**
- **Through July 21, 2023**

Side effects aside; let's consider the benefits:

CORONAVIRUS DISEASE 2019
(COVID-19)

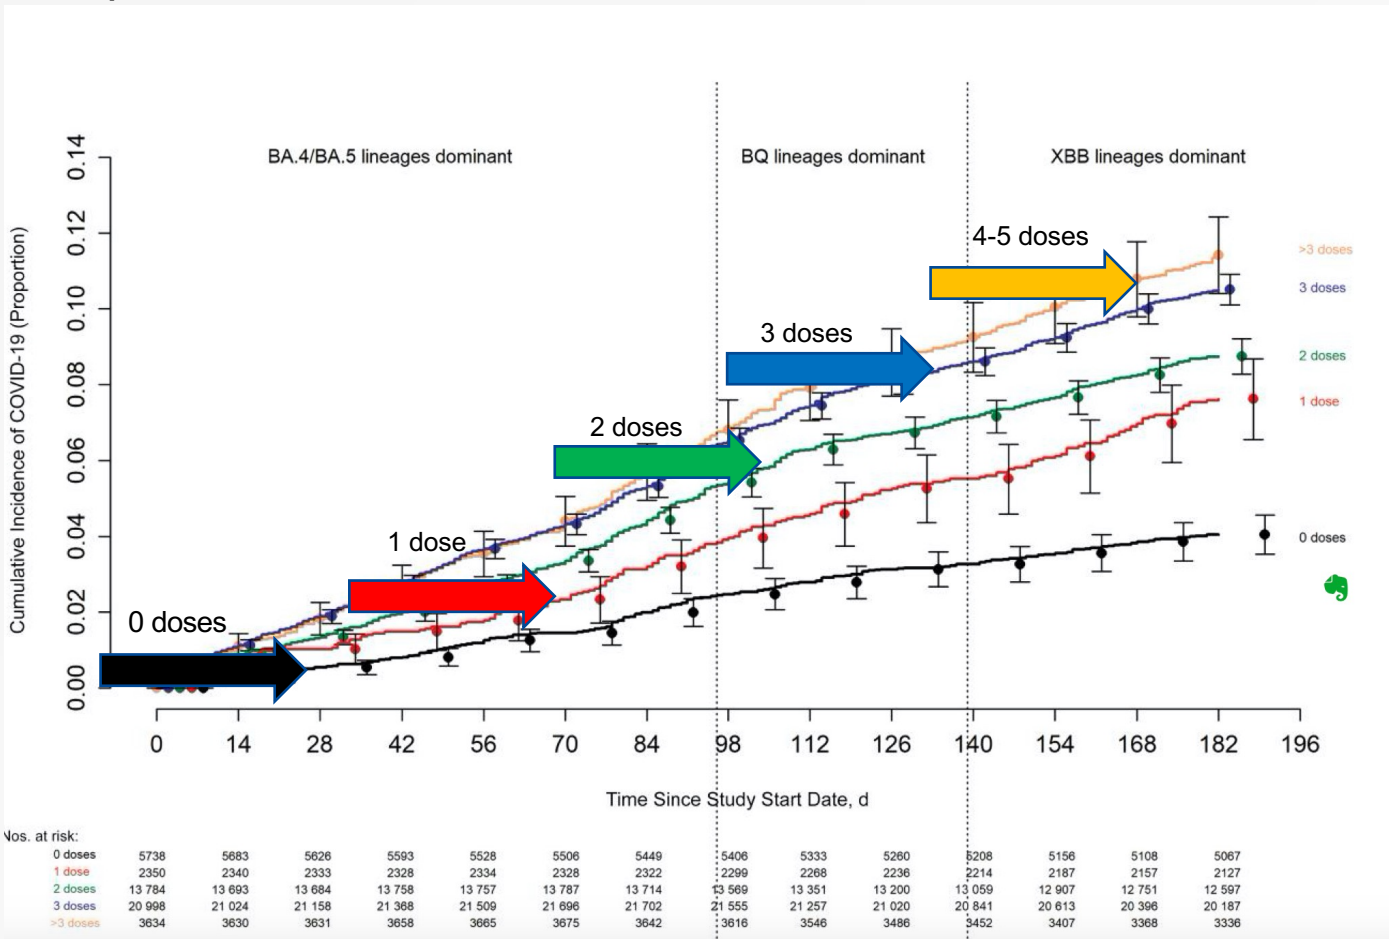

Getting a COVID-19 vaccine will help keep you from getting COVID-19.

The infographic features a woman in a red polo shirt and a blue face mask standing in the foreground with her hands on her hips. A bandage is visible on her right upper arm. In the background, a man in a purple t-shirt and blue pants, also wearing a blue face mask, is sitting on a green examination table. To the right, there is a grey shelving unit with books, a potted plant, and other items. The CDC logo is in the bottom left corner, and the URL cdc.gov/coronavirus is in the bottom right corner.

First Cleveland paper:

„The risk of COVID-19 also increased with time since the most recent prior COVID-19 episode and with the number of vaccine doses previously received“
